

# GIRLS IN TECH VANCOUVER

## ABOUT

Girls in Tech Vancouver is a chapter of the global non-profit Girls in Tech. Their mission is to support women by providing them with the education and community necessary to succeed.

Specifically, the Vancouver chapter is interested in the retention of females in technical roles. To do this, they aim to host events quarterly to carry out their mission in the local tech community.

 For the most part, the percentage of computing occupations held by women has been declining since 1991, when it reached a high of 36 percent.

-Bureau of Labor, 2016

## WHY GIRLS IN TECH

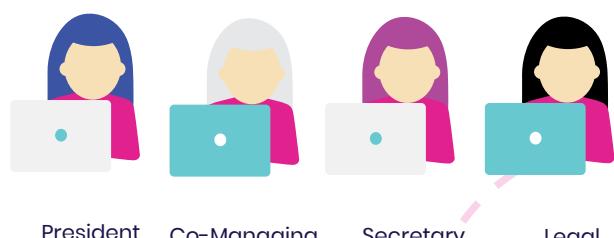

As suggested by the National Center for Women & Information Technology, women not staying in tech is an apparent issue. Girls in Tech Vancouver aims to tackle this systematic problem on a local level, which we believe is an interesting premise to explore. In addition, the organization is already self-aware of potential opportunities for improvement and are open to us analyzing their processes.

## DESIGN FOCUS

To align with Girls In Tech's mission of improving retention of female workers in the tech industry through events, our team will focus on strengthening interactions between industry professionals and participants during events.
